DETAILED ACTION

1. This action is responsive to the amendment received on December 10, 2004. Claims 1-24 have been cancelled. Claims 25-37 have been newly added. Claims 25-37 are pending examination.

Claim Rejections - 35 USC §102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claim 1-24 are rejected under 35 U.S.C. 102(e) as being anticipated by **Salesky**, U.S. Patent No. **6,343,313**.

4. As to claim 25, Salesky teaches a method performed on a computer for sharing an application using screen sampling, the method comprising:

receiving from a presenter a selection of a shared application (see Fig. 6a and 6b);

monitoring function calls made by the shared application to dynamically determine a position and a size of a window for the shared application (see Fig. 6a and 6b, col. 2, lines 28-54, col. 16, lines 16-46);

Art Unit: 2155

monitoring function calls made by a non-shared application to dynamically determine a position and a size of a window for the non-shared application (see Fig. 6a and 6b, col. 2, lines 28-54, col. 16, lines 16-46);

comparing the position and the size of the window for the shared application against the position and the size of the window for the non-shared application to determine any overlapping regions (see Fig. 6a and 6b);

capturing a screen shot of an image corresponding to the window for the shared application (col.1, lines 18-34); and

transmitting the screen shot of the image corresponding to the window for the shared application and information for the overlapping regions to a viewer (col. 10, lines 29-52, col. 16, lines 16-46).

5. As to claim 26, Salesky teaches the method of Claim 25 further wherein:

the transmitted screen shot of the image corresponding to the window for the shared application and information for the overlapping regions can be used to display the image to the viewer with the overlapping regions filled in with an arbitrary color (Fig. 6a and 6b, col. 15, lines 36-44, col. 16, lines 16-46).

6. As to claim 27, Salesky teaches the method of Claim 25 further comprising:

compressing the screen shot of the image corresponding to the window for the shared application (col. 2, lines 29-38).

7. As to claim 28, Salesky teaches the method of Claim 25 further comprising:

capturing a screen shot of an updated image corresponding to the window for the shared application (see Fig. 4a – 4e, col.12, lines 17-33);

transmitting the screen shot of the updated image corresponding to the window for the shared application to a viewer (col.12, lines 17-33).

8. As to claim 29, Salesky teaches the method of Claim 25 further comprising:
periodically capturing the image corresponding to the shared application window (col. 7, lines 35-56).

9. As to claim 30, Salesky teaches the method of Claim 25 further comprising:
determining whether the position or the size of either the window for the shared application or the window for the non-shared application has changed (col. 7, lines 35-42); and

transmitting information about the change in the position or the size to a viewer (col.7, line 66 – col. 8, line 9).

10. Claims 31-36 are essentially the computer-readable storage medium for the above-mentioned claim (claims 25) and are thus rejected under the same rationale.

11. As to claim 37, Salesky teaches a data conferencing system comprising:
a presenter computer connected to one or more server computers via a global area network (see Fig. 1, presenter client computer);

a viewer computer connected to the one or more server computers via the global area computer network (see Fig. 2, attendee client computer); and

a computer program executable by the presenter computer, wherein the computer program comprises computer instructions for:

receiving from a presenter a selection of a shared application (see Fig. 6a and 6b);

monitoring function calls made by the shared application to dynamically determine a position and a size of a window for the shared application (see Fig. 6a and 6b, col. 2, lines 28-54, col. 16, lines 16-46);

monitoring function calls made by a non-shared application to dynamically determine a position and a size of a window for the non-shared application (see Fig. 6a and 6b, col. 2, lines 28-54, col. 16, lines 16-46);

comparing the position and the size of the window for the shared application against the position and the size of the window for the non-shared application to determine any overlapping regions (see Fig. 6a and 6b);

capturing a screen shot of an image corresponding to the window for the shared application (col.1, lines 18-34); and

transmitting the screen shot of the image corresponding to the window for the shared application and information for the overlapping regions to the viewer computer (col. 10, lines 29-52).

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within

Art Unit: 2155

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
